August

Sound-absorbing sofa and armchair

Design: Pent Talvet, Iseasi

The timeless and playful August series ranks among Intuit's TOP 3 popular products. We designed the August range to perfectly address the room acoustics issues which makes it a perfect choice for an intuitive workplace. Get away from the constant distractions, and quieten the noise when it's all too much.

With sound-absorbing walls, August gives you a private oasis within even the noisiest of surroundings, and the different height options make August versatile enough for conversations in your Social Zone, or focused individual work in your Concentration Zone.

Encourage focus and seclusion

Host private meetings

Divide your space organically

Cut down on background noise

PRODUCT INFORMATION

Versions

Available in 3 different heights and 3 different sizes

Acoustics

Sound absorption class A

Legs

Available with regular legs and 360° swivel base (only for armchair)

Accessories

Tables to add functionality to the seating area

Electrical outlet

Under the seating attached to the frame

Warranty

5 years

Sustainability

Embraces the principles of circular design

Test & Certification

- L1 European Standard strength, durability and safety certificate
- · Acoustic absorption test Class A

STANDARD MATERIALS

Frame

Solid wood and plywood

Seat & backrest

Durable HR foam; fire retardant HR foam on request; fixed seat and back cushions

Legs

Solid oak / Powder-coated metal

Tables

Matt high-pressure laminate, or mass-colored wood fibreboard top with matt powder-coated metal legs

Fabric upholstery

The cover material is not removable

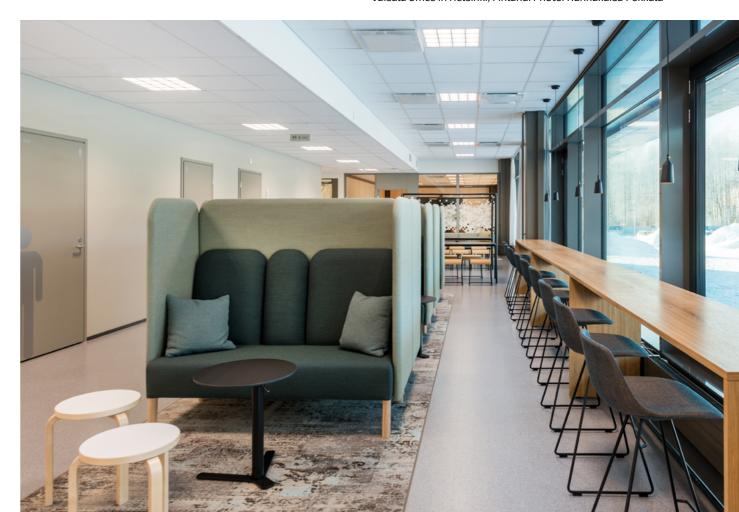

Sides and rear wall of H3 models can exclusively be covered with felt fabric only

Choose any fabric from **Intuit Standard Fabric Collection**

Additional information

As part of after-sales service we offer the change of cover fabric and all other components if needed

SOUND-ABSORBING FURNITURE

Public space and open offices often have problems with resonance, meaning that sounds reverberate for too long. Sound waves cannot move freely in a closed room and bounce off the structure of the room. Some of the sound is absorbed by surfaces, while some reflects from them.

Monitoring sound absorption and achieving the recommended reverberation duration is one of the principal tasks in the acoustic design of rooms. Acoustic absorption means that sound does not reflect off a material after reaching it. That is also the principle of designing furniture with acoustic properties: furniture has to absorb the sound that would otherwise reflect back and contribute to unwelcome noise.

Creating a more pleasant environment requires us to dampen all kinds of different sounds, such as fans, people's footsteps, conversations and phone calls.

Acoustic August

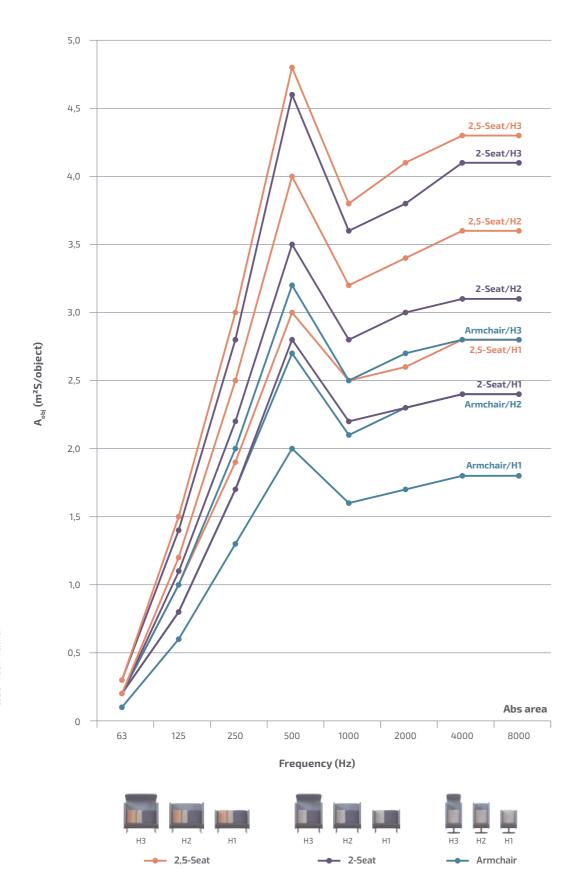

The entire August series is designed to improve office acoustics which makes it a perfect choice for an intuitive workplace. August product series gives you more absorption area in the room, e.g better sound and less reverberance. A less reverberant room gives you better speech quality and less noise in the work environment.

The August products are rated at the highest Class A for sound attenuation. This means that they offer noise reduction equivalent to covering additional square meters of a room with 100% sound-absorbing material. The specific amount of square meters covered depends on the surface area of the chosen August model.

Equivalent absorption area per object (m²Sab / object)

For example, the calculated sound absorption value for the August 2.5-S/H3 sofa model is $4.8m^2$ /sab. This is comparable to completely covering an area of $4.8~m^2$ with a material that absorbs 100% of sound. In practical terms, one August 2.5-S/H3 sofa provides the same noise reduction as about 12-13 sound absorber walls, each 50mm thick and covered with cloth or felt, measuring 600x600 mm.

AKLKOP Calculated acoustic absorption values of Augus

Equivalent absorption area per object (m²Sab / object)

For example, the calculated sound absorption value for the August Workbay 2.5-S/H3 model is 10.7m²/sab. This is comparable to completely covering an area of 10.7 m² with a material that absorbs 100% of sound. In practical terms, one August Workbay 2.5-S/H3 provides the same noise reduction as about 29-30 sound absorber walls, each 50mm thick and covered with cloth or felt, measuring 600x600 mm.
