Intuitive furnishing for getting things done

Our way of working has changed. It's the creative problem solving, agile collaboration, and the feeling of community we search for in the office. Intuit's designs have evolved to meet this shift.

We've taken the spirit of the breakout space and divided it into 4 distinctive work zones – each designed to meet a particular need to encourage creativity and connection.

Our 4 Zones use modular and multi-functional furniture solutions to make the most of every area of the office.

Providing alternate spaces to choose where to work within the office drives a more effective workspace, a better work experience, and better individual performance. A win-win!

The world is moving fast – with Intuit, you make sure office space can keep up.

Workplace café

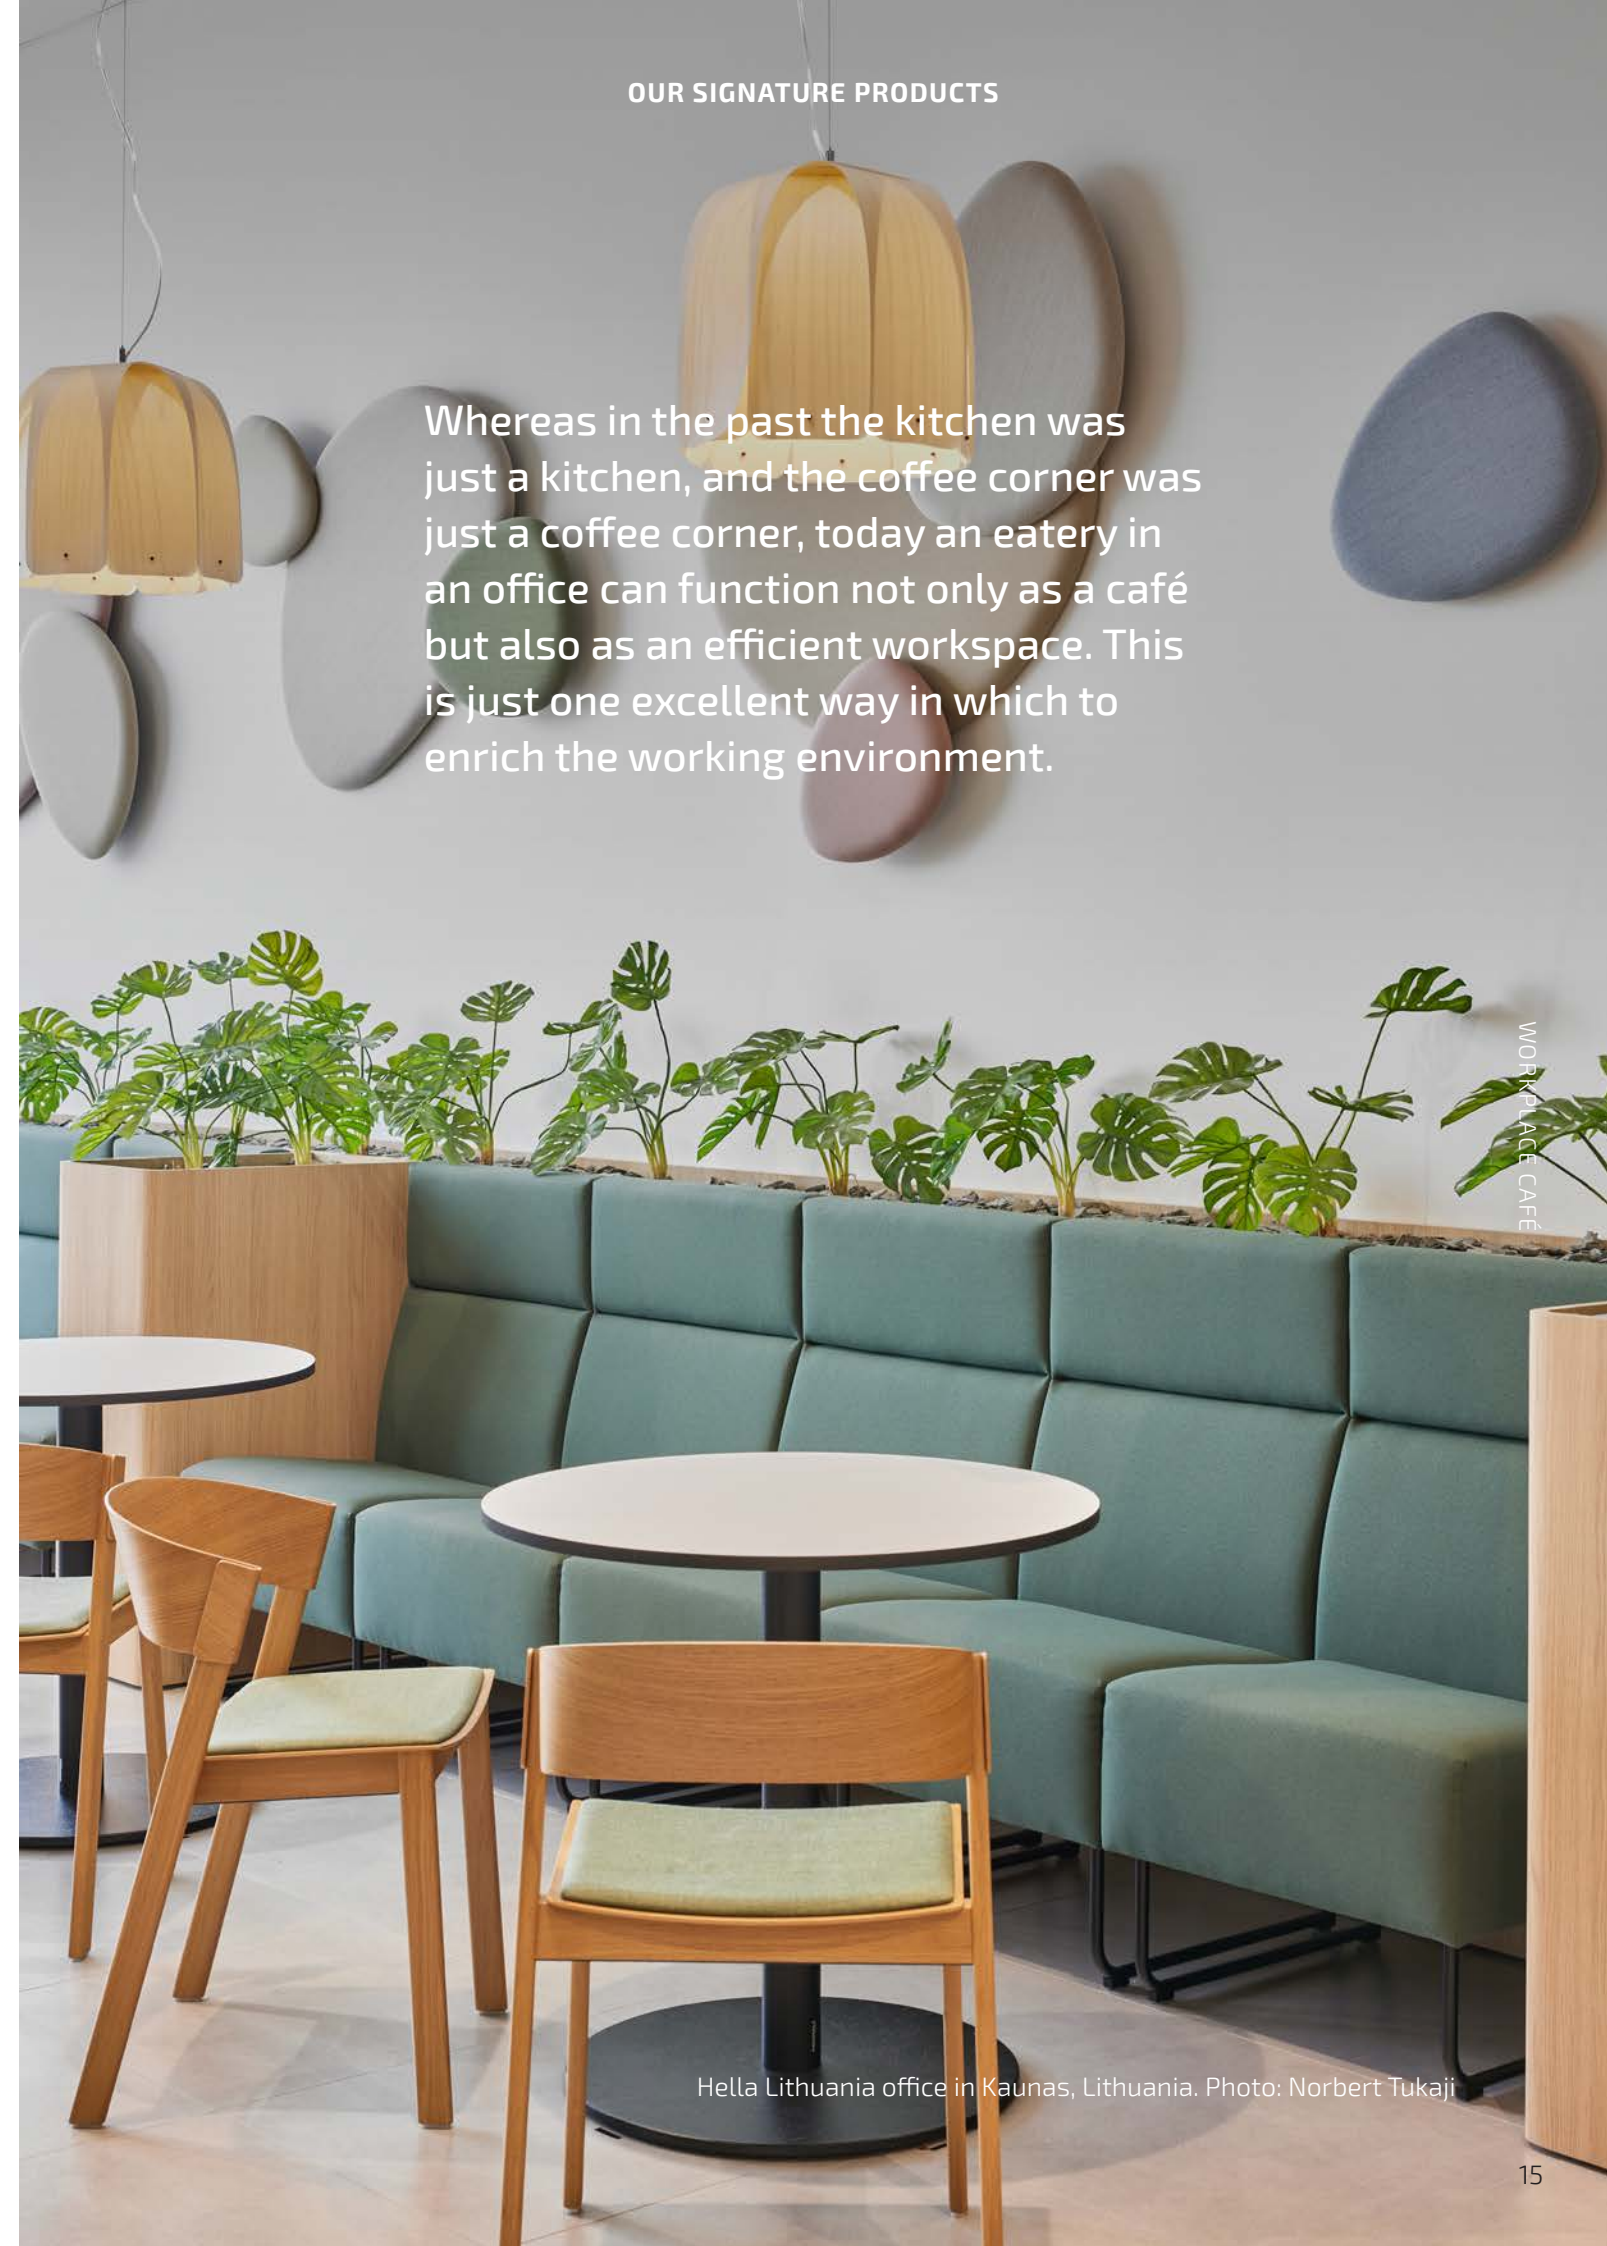

A trend which has seen notable growth as a prominent hybrid working solution is the work café. Reframing the idea of a workplace cafeteria into a gathering space for relaxed collaboration ultimately transforms the use of the area, and either offers an additional workstation for those seeking a change of space, or presents more independent workers the opportunity to feel more involved.

A key factor to consider when successfully integrating work café spaces, is that they should exist to be a destination space within the office, rather than as an area for a short stay.

Whereas in the past the kitchen was just a kitchen, and the coffee corner was just a coffee corner, today an eatery in an office can function not only as a café but also as an efficient workspace. This is just one excellent way in which to enrich the working environment.
