

Node

Modular sofa system

Design: Argo Tamm

Designed for larger public interiors where flexibility, presence and spatial structure must work together, Node is a modular sofa system created to shape central spaces with confidence. Developed as a natural evolution of Intuit's highly versatile Meeter series, Node expands the same core strengths into a larger, more expressive format — offering greater comfort, stronger visual presence and broader planning potential for spacious environments.

With its modular logic, Node allows designers to build straight, curved and expansive seating landscapes that adapt to the scale and rhythm of each project. Available in two heights and multiple straight and rounded modules, Node supports everything from open social interaction to more defined spatial zoning.

Its larger form makes it particularly well suited for foyers, waiting areas, hospitality spaces, educational hubs and public interiors where furniture must do more than provide seating — it defines the atmosphere and creates purposeful gathering points.
